

Our magnificent scientific collections tell the story of our planet. The Collections Care Fund is vital to ensuring the highest level of professional care, so our irreplaceable collections can be used for many generations to come.

Scientists around the world and at DMNH study our specimens to learn more about the natural world. In addition, staff build and update databases containing information about our holdings and their data. University students use the collections as part of their classes, and visitors explore through behind-the-scenes tours.

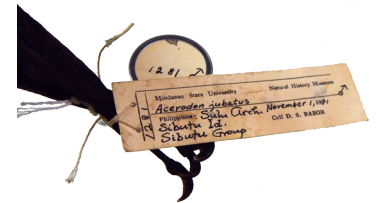

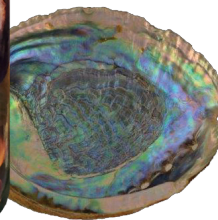

113,000
bird specimens

36,000
clutches of eggs

2 million
mollusk specimens

6,000 mammal specimens

	Mollusk Sponsor \$5,000	Bird Sponsor \$3,000	Mammal Sponsor \$1,000
Tour of scientific collections (up to 10 adults during year of support)
